Custom Cold-Formed Automotive Components

Made to your drawing. Multi-station cold heading and secondary processing for custom fasteners and precision parts.

Manufacturing focus

Existing 206 cold-heading equipment
Multi-station cold heading
Thread tapping and thread rolling
Drawing-defined secondary requirements
First-article inspection and optical sorting

257 equipment is a planned addition. Details will be updated after arrival, installation and validation.

Representative component families

Weld nuts
Weld bolts and screws
Ball studs
Threaded tubes and sleeves
Custom formed parts, pins and shafts

Manufactured in Foshan, Guangdong, China. The final material, geometry, process, quantity and inspection scope are confirmed for each project.

Quality scope and your project enquiry

IATF 16949:2016

Certification scope: The manufacture of metal fasteners.
Certification body: NQA **IATF certificate:** 0568284
Issued: 09 March 2025 **Valid until:** 08 March 2028

The supplied certificate excludes clause 8.3 product design. Refer to the complete certificate for its scope and conditions.

Define the critical characteristics

Share the dimensional checks, material requirements, traceability and approval records that your project needs. The inspection scope is agreed around the part.

What to include in your RFQ

Drawing revision or part description; material and finish; critical dimensions; sample and production quantities; target timing; required inspection and documentation.

Need an NDA before sharing confidential files? Contact the project team to discuss the appropriate arrangement.
